

Medical Information for Admissions

Daymark Residential Treatment Center is a non-medical facility and ensures the provision of medical and pharmaceutical services if provided by client at the time of admission. All medication administration is documented in the Medication Administration Record. Administration of medications is carried out by staff trained in medication administration. Clients are only allowed to take medications that are prescribed to them and approved by medical staff; compliance with medication management is a part of the treatment program and clients who continually refuse medications can possibly be staffed for medical discharge.

**It is the client's responsibility to handle all doctor and dental appointments prior to admission; clients will not be allowed to leave the facility for medical reasons unless it is emergent! In cases of emergent medical needs, medical care is accessible offsite 24hrs a day. Clients are financially responsible for their own medical bills. **

Medications

- Please bring with you a 30-day supply of ALL medications + approval for refills on any meds that require it.
- All medications must be properly labeled, your name must be on the prescription label, there should be no more than the prescribed amount of pills in the bottle and dates/prescriptions must be current.
- Daymark Residential does not administer controlled substances; clients must be off all controlled substances prior to admission

Over-the-Counter (OTC) Medications:

- Any OTC medication, that is not prescribed by a medical doctor, will not be permitted.
- Over the counter drugs are ordered by the medical director based on the assessment of the person served.

Medical Conditions/Illnesses

Daymark residential is a non-medical facility and cannot accept high risk medical clients or clients who have certain illness/conditions. A medical screening will be conducted prior to admission into the program. The following conditions cannot be accommodated:

- Insulin Dependent Diabetics
- Clients requiring Oxygen
- Surgery/Medical Procedures within past 6months
- Open Wounds/Sores
- Non-Ambulatory Clients or any client who is unable to perform ADL's independently
- HIV+ clients who are non-compliant with medications
- Respiratory Infections

- Non-compliant to mental health medications (Bipolar, Schizophrenia, Schizoaffective)
- Elevated Blood Pressures
- Pregnant Clients who are **NOT** under prenatal care!
- Clients who are intoxicated and or has a breathalyzer reading at or above the legal limit of .08
- Clients who have not been properly detoxed (Alcohol and Benzodiazepines)

Prohibited Medications

The following is a list of medications that are not allowed while at the Residential Treatment facility. This is not an exhaustive list; not all prohibited medications may be listed.

- Narcotics
- Benzodiazepines
- Stimulants
- Lyrica
- Injectable Insulin
- OTC (over the counter) medications
